Projects & Blog Posts

Blog Post : My First Reported Vulnerability - Fake WordPress Plugin

Available at : <https://n-mcclure.github.io/writeups.html>

This article covers my experience reporting a vulnerability that I detected in the website of a local pizzeria while learning to use the tool **WPscan**. It goes over how I found the vulnerability, the roller coaster of emotions I had, and how the aftermath of reporting the vulnerability went.

Project : CanScan - Barcode Decoder & Canadian Product Identifier

Available at : <https://n-mcclure.github.io/index.html>

This project was something I built as a tool to combat the American tariffs when they first started. It allowed me to practice the usage of APIs, responsive UI across multiple device sizes, and experiment with decoding barcodes. I hope to further this application to utilize Computer Vision in a later version.

Certificates & Awards

CyberStart 25/26 Introductory Pathway - Certificate of Completion February 2026

This is a certificate that I received after completing the introductory pathway for CyberStart 2025 / 2026 on TryHackMe.

Industrial Intrusion - Certificate of Completion July 2025

This is a certificate that I received after competing in and finishing the Industrial Intrusion CTF event on TryHackMe.

Award For Technology - Award June 2022

I was awarded this at my Highschool Graduation for my "excellence in Technology courses, such as Woodshop, Auto repair, Computer Engineering, and Computer Science".

Award For Computer Science - Award June 2022

I was awarded this award at my Highschool Graduation for my "Excellence in Computer Science".

Education

Honours Bachelor's Degree - Cybersecurity
Sheridan College, Oakville, ON

September 2024 - Present

College Diploma - Computer Programming
Sheridan College, Oakville, ON

September 2022 - August 2024

Highschool Diploma
St. Ignatius of Loyola, Oakville, ON

September 2018 - June 2022

Work Experience

D-Sports - Junior Backend Developer

April 2026 - Present

As a junior backend dev, I find myself getting my hands on various different aspects of the codebase. I work on connecting the mobile app to our API / rewritten backend, testing the website for any security vulnerabilities, and the development of mini games to boost user engagement among fans across the app.

ISSessions - Club Vice-President

May 2026 - Present

As Vice-President of Canada's largest student run Cybersecurity club, I am in charge of managing most administrative tasks for the club, forming / leading our team of executives, and ensuring everything from our annual CTF event to our bi-weekly meetings run smoothly.

ISSessions - Online Content Developer

May 2025 - May 2026

As a Content Dev for Canada's largest student run Cybersecurity club, I was in charge of taking photos and videos to post on our various social media events to capture our events, as well as presenting news stories of recent security news at our bi-weekly meetings.

Mariano's Pizza - General Worker

September 2023 - October 2024

As a general worker, I was in charge of taking orders, making pizzas, and ensuring customers received hot and fresh products.

Wendy's (Brantford) - Grill / General Worker

May 2023 - September 2023

As the store's main grill worker. I was tasked with preparing all of the protein, helping with sandwiches, cleaning all the fryers and grill, cleaning bathrooms, getting rid of the trash throughout service and at the end of the night.
